~~Ford Escort Fiesta Rear Drum Brake Auto Adjusting - YouTube~~

Rear drum brakes have been the standard for many years in the automotive industry. Drum brakes generally cost less to produce than disc brake systems but are less efficient than their counterpart rear disc brakes. This is why there are featured on the rear of a vehicle only. Brake shoes are purchased in sets of four, two on each side.

~~How to Replace Brake Shoes and Drums in Under 90 Minutes~~

The self adjusters for rear drums have never worked properly since they were designed for Fiesta's, Escorts, Puma's Ka's etc. The easiest way to adjust the rear brakes is to remove the rear wheels and drums and adjust them by hand, also blow out all the dust and inspect rear brake cylinders at the same time for leaks.

Remove the brake drum. Using a brake adjusting gauge, measure the inside diameter of the brake drum. Compare the brake drum measurement to the brake shoes. Adjust the brake shoes by inserting a brake adjustment tool into the knurled quadrant of the rear quad operating lever and adjust the shoes to the same measurement as the brake drum. Install the brake drum.

## ~~Ford Capri Brake Drums for sale | eBay~~

Many times restoring proper brake pedal height and parking brake function is just a matter of adjusting the rear drum brakes on your Ford vehicle. As the brake shoes wear, the distance between the shoe and the drum increases. This causes the brake pedal or parking brake lever/pedal to move farther before the shoes make contact with the drum. Adjustment of the Ford drum brake system is well within the average home mechanic's ability.

## ~~How to Adjust Ford Drum Brakes | It Still Runs~~

Step 1 Brake Shoes. Jack up the rear of the car and place it on jack stands. Remove the rear wheels and chock the front wheels. Never work underneath a car that is supported only by a jack. Open the hood and locate the brake fluid reservoir. Remove the cap from the brake fluid reservoir and set it aside.

Apart from all part numbers retrofitting the rear disc brakes is identical for the Focus MK3/MK3.5. Note that rear drum brakes are really rare on a Focus MK3/MK3.5. Most European countries do have rear disc brakes as standard for all Focus MK3/MK3.5 versions. Even in the Netherlands where I live (with no hills at all) rear disc brakes are standard.
