Optic Nerve Disorders: Diagnosis and Management: Amazon.co ...

Optic neuritis occurs when swelling (inflammation) damages the optic nerve — a bundle of nerve fibers that transmits visual information from your eye to your brain. Common symptoms of optic neuritis include pain with eye movement and temporary vision loss in one eye. Signs and symptoms of optic neuritis can be the first indication of multiple sclerosis (MS), or they can occur later in the course of MS. MS is a disease that causes inflammation and damage to nerves in your brain as well as ...

Optic neuritis - Symptoms and causes - Mayo Clinic

DOCTORS: Click here for the Professional Version Ischemic optic neuropathy is damage of the optic nerve caused by a blockage of its blood supply. Blockage can occur with inflammation of the arteries (called arteritic, typically as part of a disorder called giant cell arteritis) or without inflammation of the arteries (called nonarteritic).

Ischemic Optic Neuropathy - Eye Disorders - MSD Manual ...

Neuromyelitis optica (NMO), also known as Devic's disease, is a rare condition that affects the spinal cord and the nerves of the eyes (optic nerves). It can cause a wide range of symptoms, such as weakness, blindness, nerve pain and muscle spasms. These will vary from person to person – some may only have one attack of symptoms and recover well, whereas others may be more severely affected and have a number of attacks that lead to disability.

Neuromyelitis optica - NHS

Toxic amblyopia is damage to the optic nerve caused by undernutrition or by exposure to a substance that is harmful to the optic nerve, such as lead, methanol (wood alcohol or methyl alcohol), ethylene glycol (antifreeze), or certain drugs. A nutritional deficiency or toxic substance is often the cause of toxic amblyopia.
