Answers To Collision Theory Gizmo - partsstop.com

What is the collision theory? It is the idea that particles have to collide in order to react and they have to collide hard enough (with enough energy to break the bonds - activation energy). How does a higher temperature increase the rate of reaction? When the temperature is increased the particles have more energy and move quicker.

Student Exploration: Plate Tectonics slowly-moving sections of Earth's crust. At plate boundaries, plates collide, move apart, move under or over each other, or slide past one another. The theory of plate tectonics describes how the plates move, interact, and change the physical landscape.

Student Exploration Plate Tectonics Answer Key

6. Propose a theory: Based on what you have observed, explain why you think phase changes occur. If possible, discuss your theory with your classmates and teacher. Sample answer: Phase changes occur because of the energy of molecular motion. As heat is added to a solid, the molecules break out of their bonds and begin to move freely, causing
